

This role is being advertised in order to provide resilience across our population of Regional General Managers in London.

As such, it is a requirement for the successful applicant to be able and willing to work from a minimum 2 of our Regional Treatment Centres:

- Essex – Buckhurst Hill
- London West - Ealing
- London South – Brixton
- London Central – Whitfield Street

The successful applicant will be assigned one of these Regions based on their 2 preferred locations which will be discussed before progressing to interview stage.

It would be beneficial if 2 preferred locations were stated within your application.

It should be noted that this role is not a work at home or hybrid working position – there is a requirement for the successful applicant to be onsite at one of the above locations full time.
