Who we are

MSI Reproductive Choices UK is a global organisation providing personalised contraception and safe abortion services to women and girls. Our local teams of professionals are passionate about the work they do in communities across 37 countries. The services we provide give a woman the power to choose when she has children so that she 's free to pursue her plans and dreams for herself and her family.

The primary responsibility of this role is to further MSI's Goal: The prevention of unwanted births and its mission of ensuring an individual 's right to: children by choice, not chance.

The Function

The Global Information Services (GIS) team provides digital solutions and operations across 37 countries. We have 40+ team members based in London and Bristol, with smaller IT teams in many of the countries in which we operate. Our role spans from the provision of new global digital solutions, to the ongoing maintenance and support of applications and infrastructure.

The Role

The Business Application Support role (Operations & Clinical Solutions) will support aspects of the current and in development Electronic Patient Record (EPR) solutions with an emphasis on reporting (known within the business as CRS and Maxims respectively). The Primary focus of the role will be on the new system that is currently being developed.

Our solutions are used across all 60+ MSI UK sites, to ensure that the application is supported and available within SLAs.

The role will support any development work around the EPR and supporting external services (like reporting) to meet changing business requirements and demands.

The role will work in collaboration with the Data and Digital Transformation teams, GIS and the relevant project teams, supporting their work and assisting under their direction.

The role will facilitate configuration, reporting and other dev duties in and around the EPR solutions and supporting products, helping to ensure the new solution is rolled out within the project time deliverable.

This role will work with and respond to both current project work and BAU support / requests as and when required.

The role will provide exposure to many different technical areas and provide opportunities to get involved in a multitude of functions across the business.
